

Summer Institute on

BOUNDED RATIONALITY

Search and Learning | June 14 – 22, 2022

Apply by March 15, 2022

We are delighted to announce that the 20th Summer Institute on Bounded Rationality will take place **June 14 – 22, 2022**, at the Max Planck Institute for Human Development in **Berlin, Germany**.

The Summer Institute brings together talented young researchers and renowned scientists from around the globe and aims to spark a dialogue about decision making under the real-world constraints of limited time, information, and computational power. The Summer Institute offers a forum for young scholars from various disciplines to share their approaches, discuss their research, and inspire each other. The program will cover the fundamentals, methodology, and recent findings on bounded rationality.

This year's Summer Institute will approach the topic **search and learning** through the lens of bounded rationality and interdisciplinary research on human decision making. It is our pleasure to announce that Armin Falk, Professor of Economics at the University of Bonn and Chief Executive Officer of the briq Institute on Behavior & Inequality, will be giving the "Joachim Herz" Keynote Lecture. This year's "Hero of Science" Keynote Lecture will be given by Naomi Oreskes, Henry Charles Lea Professor of the History of Science at Harvard University.

On behalf of the directors of the Summer Institute, Gerd Gigerenzer and Ralph Hertwig, we invite young scholars of decision making from all fields to apply. Participation is free, accommodation is provided, and travel expenses will be partly reimbursed.
